DETAILED ACTION

Allowable Subject Matter

1. Claims 24-29 and 45-56 are allowed.

The following is an examiner's statement of reasons for allowance:

The following invention is deemed to be a distinct and non-obvious improvement over the cited prior art. Regarding claims 24, 45 and 50, the claims comprise an energy/force indicator which an energy indicator positioned relative to the support to be engaged by a bimetallic member in a second post-snap state, a means for qualifying an energy released by the bimetallic member during transit from the first pre-snap state to a second post-snap state, the qualifying means being positioned relative to the supporting means to be engaged by the bimetallic member in the second post-snap state and a force indicator engaged with a surface of the second structural member facing toward the first structural member and spaced above the first and second annular lands for measuring a force generated by the central portion of the bimetallic member transitioning between a first state wherein the central portion is proximate to the surface of the first structural member and a second state wherein the central portion is proximate to the force indicator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents, 5043690, 4970485, 3466587, 3218417, 2988621 and 3370142 all teach bi-metallic switching devices.
